

Title: Static Under keel Clearance requirements

Applicable: Western Basin 3 and Dyke 2 berths

Reference: Harbour Master Instruction HMI 21-005E

Vessels loading at Western Basin 3 or Dyke 2 must meet the below minimum static UKC requirements:

- Whilst Alongside - Always maintain 0.50 metres under keel clearance
- *Within the navigational Channel – Not less than 10% of the vessel's deepest draft as per ship handling safety guidelines*

Any variation to this Harbour Master Instruction must be approved by the Harbour Master.

NB: HMI 21-003E has been cancelled as of the date of this document.
