

Local Marine Notice 001-2026 v.3

Port Botany

Brotherson Dock – Aerial Drone Survey

Please be advised that **aerial drone inspections and marine-based survey works** will be undertaken at Brotherson Dock, Port Botany. The works will involve drone capture of the wharf structures at **berths 5, 6, 7, 8, 9, 10, 11 and 12**, as well as a manned survey vessel capturing imagery of the undersides and water interfaces of the maritime structures.

The activities are scheduled to commence on **13 January 2026** and will continue until **31 May 2026** (weather dependent). Both the drone and the survey vessel require clear access around the wharf structures during the capture periods. Operations will be carefully coordinated around port operations, shipping schedules, and prevailing weather conditions to minimise any disruption to vessel movements.

The survey vessel will monitor VHF Ch.12 at all times.

Survey vessel: *Minicat*. Rego 465366
