

Local Marine Notice 007-2026 v2

Port Botany

Brotherson Dock – Detailed Inspection

Please be advised that a detailed inspection program for **Brotherson Dock**, covering berths 5, 6, 7, 8, 9, 10, 11, 12 and the Southern Return Wall will be carried out approximately until **31 May 2026** (weather dependent).

The works will include visual inspection of the wharf structures above and below the waterline along with delamination testing using hammer tapping. Concrete coring will be undertaken at nominated locations as part of the concrete testing, with all core holes to be reinstated after the extraction of samples.

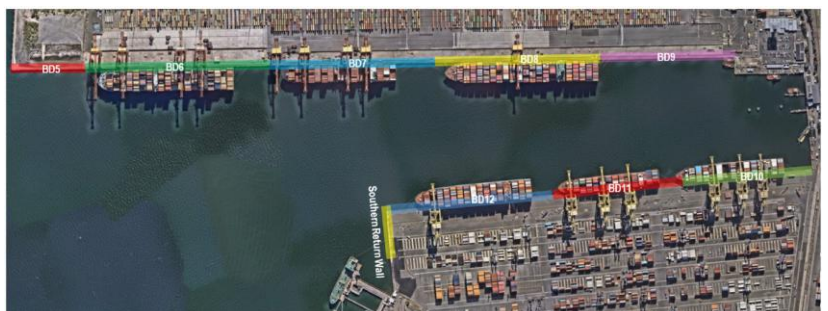

Waterside access from a vessel will be required to facilitate inspections of the underside and frontal faces of the wharf structures. Underwater inspections will also be conducted by qualified divers.

The schedule is subject to berth availability and prevailing weather conditions. The inspection program may continue through to April 2026.

Mariners navigating in the vicinity are requested to proceed with caution and remain alert to inspection vessel movements and diver activity.

Vessel *Party Punt*, UVI 448963 will be used for waterside inspections.

Highlighted areas indicate the work zones.
